AI Product & Strategy: translating ambiguous user problems into scalable systems, measurable outcomes and shipped products

@ utkarshagrawalindia@gmail.com +91-9893167691 utkarshagrawal Utkarsh Portfolio

EDUCATION

Indian Institute of Technology Kanpur
Mathematics & Scientific Computing 8.1/10
2021-2025 Kanpur, India

COMPETITIVE ACHIEVEMENTS

- National Finalist, HSBC India Case Program 24–25; among 8K+ teams, developing product, finance & strategy case solutions over 5 rounds
- Secured All India Rank 691 in JEE Advanced 2021 and All India Rank 697 in JEE Main 2021
- Awarded KVPY Fellowship (2021) & accredited as NTSE Scholar (2019) by Government of India

RESEARCH EXPERIENCE

Indian Institute of Management Indore
Finance Research Intern May'23 – Jun'23

- Assessed India's impact investing landscape to identify structural challenges & emerging trends
- Synthesized insights from 50+ reports, 10+ investor interviews & media reports to map stakeholder incentives, pain points and investment priorities
- Co-authored and presented research on India's impact investing ecosystem at XIX International Conference, IIM Bangalore

Human-Computer Interaction
RailMadad Application Redesign - IITK Feb'24 – Apr'24

- Analyzed user reviews across Google Play and X to identify recurring usability pain points across complaint registration, tracking, login and safety
- Evaluated & redesigned customer journeys through cognitive walk-throughs to identify usability gaps and refine product recommendations
- Prioritized UX improvements and redesigned key workflows, including complaint tracking, category selection, PNR-based login & emergency assistance

INTER IIT TECH MEET 11.0

Gold Medal | Grad Capital's Tech-Startup Case
High Prep Event Jan'23 – Feb'23

- Evaluated value chains across 10+ industries and conducted 150+ user interviews to identify high-potential problem spaces
- Developed a distributed-computing startup concept delivering distributed cloud compute infrastructure at 20% lower cost than AWS
- Built business and revenue models projecting \$1.2M annual revenue through customer acquisition and infrastructure economics
- Secured First Position among 21 IITs and offered funding of \$40K by Grad Capital, to lead the startup through execution

PROFESSIONAL EXPERIENCE

Member Technical Staff, Oracle India
Oracle Cloud Infrastructure Jul'25 – Present
Received Pre-Placement Offer for exemplary performance as Intern, Summer'24

- Problem Discovery & Product Ownership:** Identified recurring bottlenecks across bug investigation and third-party upgrade workflows; translated user pain points into product requirements and solution designs in collaboration with engineering, support and product teams
- TriageX:** Built an AI-powered bug triage agent from problem definition through deployment, automating readiness checks, categorization and similar-bug retrieval using custom RAG; deployed across 5+ products, triaging 400+ bugs, thus reducing bug-resolution time with continuous improvement through product feedback
- Third-Party Patching Orchestrator:** Built an agentic workflow automating analysis, build, verification and upload of third-party libraries, with specialized agents and live deliverable tracking; deployed across FMW product lines and used for 80+ library upgrades over 3 quarters
- Impact:** Reduced manual processing time for library upgrades by ~60% on average, enabling faster execution across 5+ product teams; the workflow now operates with 2 members versus 6 at the start of the engagement

Product Intern
Qart Solutions Oct'24 – Feb'25

- Conducted user discovery with apparel brands to identify social media analytics gaps and translate user needs into product requirements
- Defined 5+ performance KPIs and prioritized platform features by analyzing workflows across 10K+ social media posts across platforms
- Designed AI-powered sentiment mapping, engagement workflow & competitive intelligence capabilities to improve decision-making
- Built and launched an MVP platform, receiving initial validation and feedback from brands including Levi's and Raymond

SKILLS

Product & Strategy: User Research, Product Analytics, KPI Design, Feature Prioritization, Roadmapping, Market Sizing

AI & Analytics: Python, SQL, Machine Learning, RAG, LangGraph, AI Agents

LEADERSHIP

Editor, Vox Populi
Students' Journalism Body, IIT Kanpur May'23 – Apr'24

- Led a three-tier organization of 50+ members, managing editorial operations across investigative reports, comics and video journalism
- Spearheaded coverage of institutional issues as infrastructure crunch, workers' rights & PhD delays through 15+ investigative stories in 5+ membered teams
- Coordinated live reporting during campus protests, keeping 20K+ readers informed and prompting outreach from the Ministry of Education
- Increased readership by 145% through audience-focused content strategy, with stories subsequently cited by national media outlets

KEY PROJECTS

- Community Building:** Founded the IITK chapter of a human-computer interaction community, building a 100+ member community
- Strategy:** Evaluated a potential Sun Pharma–Advanced Enzymes merger through synergy analysis and DCF valuation
- Content Creation:** Created 10+ educational videos for Vinyas, driving 80K+ views through audience-focused content
